

MISSION STATEMENT

Strengthen nuclear competence

The Academy4socialskills strengthen nuclear competence persons and organizations support the resource person consciously and in the harmony with the organization purpose to start. In the foreground stands the advancement of the social competence which are important for the enterprise practise. The academy makes available in addition psychotherapeutic application knowledge in contemporary form to qualify persons and to react adequately to changed need and problem positions. For the conversion of this knowledge innovative practise modules were developed in the guidance, project management, distribution management as well as knowledge management programs in the form of learning systems as well as single care technologies.

Methodical bases start

Basis for the practical work is a comprehensive enterprise picture, while the social competence of the employees and the organization is taken into consideration. Our personalities and organizations change. By steady advancement and investigation of our own behavior and recognizing of behavior patterns we are always in movement.

Push development

The advancement of our personality and the enterprise personality is our aspiration. Early experiences with relation persons are looked as stamping and leave deliberate, predeliberate and unaware reminiscent tracks which appear in the professional life often as a conflict-like repetition. With specific technologies can lead short-term learning process to the change of the conflict-like interaction. Typical change phenomena appear. This re-orientation helps to change settings, to use available resources and to position itself to new requirements.

Learn to learn

From and continuing education, consultation and Coaching in the form of open offered courses and seminars as well as internal company offers of individuals as well as teams and enterprises in the areas Softskills, management, organization development and personnel development, strategy presentation, Coaching, Mediation, team development, Changemanagement, Corporate Culture, construction Development, Knowledge strategies, Customer Relation-hip and health management.

Extend emotional knowledge

By from emotional knowledge and resources circles - emotional knowledge originates if social experience is internalized - the experiences and knowledge are preserved with it as a learning system (system of information and education system) for the modern enterprise - multimedia.

Link up strategical partners

With strategical partners from the areas of Information technologies and multinational Media technologies we make available a comprehensive achievement spectrum for the management practise in enterprise.

Are of use donate

The use for customers and members originates in the change work with the purpose for the organizations and the single employee to reach an efficiency and effectiveness increase. The desired result is the playful conversion of top achievements.
